

MODEL 2550

Hydrostatic Stump Grinder

The Bandit® Model 2550 has quickly become one of Bandit's **most popular stump grinders**. It has the all-terrain capability to reach remote stumps, but still retains excellent flotation and maneuverability to carefully traverse delicate lawns and fit through 36-inch gates. Combined with a wide grinding swing, the Model 2550 has the **versatility** to handle both large stumps in land clearing projects, and small backyard removals.

BELTLESS HYDROSTATIC DRIVE

With no drive belts, sheaves, bearings or clutches to worry about, engaging the cutter wheel is as simple as pushing a lever. Easy-to-use machine-mounted controls are intuitive and positioned to provide good visibility while grinding, allowing the operator to take full advantage of the 2550's capabilities. This reliable system delivers power directly to the cutter wheel with virtually no parasitic power loss.

HIGH POWER WITH LOW MAINTENANCE

Bandit's hydrostatic direct-drive stump grinders deliver all the stump grinding power demanded by professionals, without all of the maintenance normally associated with stump grinders. It's not uncommon for companies to see maintenance costs drop by as much as 30%, compared to traditional stump grinders.

CLASS-LEADING PERFORMANCE

The Model 2550 features a class-leading 53-1/2" cutter swing for grinding, while also grinding to a depth of 15". Equipped with the Bandit Revolution wheel as standard equipment, you'll spend less time repositioning and changing teeth and more time grinding.
